

**RICHARD JAY**

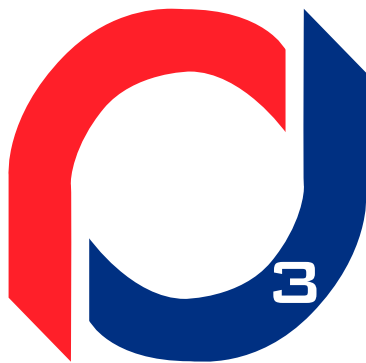

A UNIQUE SYSTEM  
OF PRODUCING OZONE  
AND INJECTING IT,  
THROUGH A PATENTED  
INTERFUSER INTO THE  
WASH PROCESS

ELIMINATES  
BACTERIA AND  
VIRUSES ON ALL  
WASH CYCLES

REDUCES  
LAUNDRY  
RUNNING COSTS

The highest level of disinfection available for laundry

**ReNew**®

**VALIDATED OZONE DISINFECTION**

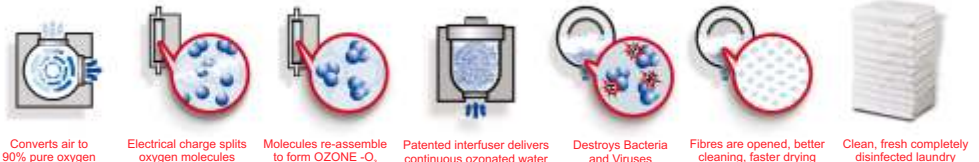

The system starts by converting air to 90% pure oxygen.  
Then an electrical charge splits the oxygen molecules,  
which are reassembled to form **Ozone** ( O3 ).

Our patented **interfuser** delivers continuous ozonated water into the wash,  
which destroys bacteria and viruses. Fibres in the linen become  
opened which means better cleaning and faster drying.  
The **ReNew** result is clean fresh completely disinfected laundry.

The system uses mostly cold water and can operate on low wash cycles meaning it makes huge energy savings.  
This in turn contributes to a reduced carbon footprint, preserving the environment and our planet.  
**ReNew** can not only disinfect on all wash cycles, but can actually prove that it has done so. The system is  
available with a sophisticated validation unit which monitors the amount of ozone being injected into the  
wash process. This guarantees complete peace of mind in all environments where infection control is critical.
