

THE SCIENCE OF HOW XEROS CLEANS

1 DESIGNED AS AN INTEGRATED SOLUTION

The Xeros cleaning process is built on extensive research and development.

Each component including chemistry, beads, water, and digital programming was tested and specified to deliver superior cleaning results.

2 THE BEADS

The beads are added to the drum to provide mechanical action and the ability to attract and absorb stains.

Agitation (Mechanical Action)

Attraction / Absorption

Absorption of Stain into the Bead

5 THE END RESULT

A complete washing system.

The Xeros machine works with our proprietary beads and chemicals to give you a superior clean.

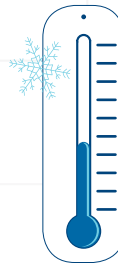

3 XEROS TAILORED DETERGENTS WORK WITH THE BEADS

Xeros scientists have developed detergent formulations to work with the beads and a small amount of water to give superior cleaning.

4 DESIGNED TO CLEAN WITH A SMALL AMOUNT OF COLD WATER

Xeros delivers superior cleaning with cold water, and Xeros uses up to 80% less water than a conventional washer.

FACTS

Xeros holds multiple patents for polymer bead cleaning
