

chemical dilution systems

BD2

The BD2 is a push-operated pump that is designed to deliver detergent directly from a product container into a commercial kitchen sink. It features a fixed 30ml dose and a 125mm non-drip aluminium outlet spout. A longer, 300mm spout is available that can swivel between two sinks allowing the use of a single pump.

The BD2 is ideally suited for use with the Brightwell 'off-floor' system providing neat installation.

This system is designed for containers up to 10 litres, it has a durable bracket, adjustable tube holder and stainless steel hook to suit industry standard containers.

Keeping chemical containers 'off-the-floor' prevents accidents and spillage. This practice also facilitates easier floor maintenance.

Safety first

Always follow the chemical manufacturer's Health and Safety Instructions when using chemicals. Protective gloves and eye protection must be worn when handling hazardous chemicals.

suitability	manual dishwash detergents
capacity	product drawn from bulk drum or bottle hanging system (optional)
pump	acetal pump with nitrile seals and 30ml shot size viton seals, 10ml or 20ml shot sizes available on request
