## Hear what our customers say about ReNew

“ We have installed Primus Industrial Washing Machines and the ReNew Ozone System from Richard Jay Laundry Equipment. The Ozone system has provided disinfection by reducing outbreaks of scabies among the young people, plus the laundry now smells fresh. The clean linen is brighter and the towels are softer and more fluffy than before. The system is saving us money on laundry running costs as we no longer need to use hot water in the wash cycle. The laundry staff are very happy with the new equipment and the fresh laundry results, Management are very pleased too, Richard Jay's have being very helpful through the entire laundry renovation ( or design and fit-out ). ”

Mark Studdert, Finance & Admin Manager,  
Brisbane Youth Detention Centre, Wacol

“ We have saved quite a lot of money since installing the ReNew Ozone system from Richard Jay, the quality of cleaning is noticeably better and we no longer need to do pre-wash cycles which saves on labour costs as well as energy saving. Other benefits have included ; a reduction in the amount of chemicals used, the absence of hot water and the removal of the cooling systems to re-cool the water before it's disposed of. ”

David Sandhaus , Maintenance Manager  
Glenlyn Aged Care Facility

“ The Department for Correctional Services are more than happy with the Ozone system and the new machinery in the new purpose built laundry at Mobilong Prison. The new laundry has Primus and Huebsch washers and dryers from Richard Jay Laundry Equipment.

The Laundry is managed and operated by a small group of authorised prisoners and designed to handle personal clothing for 320 prisoners, on a rostered basis over 5 days. All equipment has automatic dosing of laundry chemicals which eliminates over use of laundry powders and the mess associated with people adding their own laundry powder. The New Ozone system ensures optimum hygiene is reach in the cleaning process and the result is clean fresh laundry.”

Roy Steele , Facilities Manager  
Building Management Facilities Services  
Department for Transport, Energy and Infrastructure
