

# PREVENTATIVE MAINTENANCE AGREEMENT

Preventative Maintenance - for optimum performance and equipment longevity in laundry and dishwashing equipment

Like the family car, your commercial laundry and warewashing equipment requires a little TLC from time to time to keep it running well. Preventative maintenance on your machinery is vital to maximise performance, extend the life of your equipment, comply with Australian laundry standards AS/NZS 4146:2000 and avoid potentially life-threatening incidents.

A Preventative Maintenance Agreement from Richard Jay is tailored to your business's requirements and wash frequency. A PMA can be drawn up when you purchase your equipment (recommended) or at a later date.

## PMA VISITS INCLUDE

- Component checks
- Maintenance operation checks
- Health and safety checks
- Discussing equipment operation & condition
- Verify hygiene programs

## Maximise machinery performance with a Preventative Maintenance Agreement by Richard Jay

Please review the enclosed documents, sign and return to activate your contract. Questions? Please contact your Richard Jay Consultant.
